Vapor accumulation can flash or explode if ignited. Thermal decomposition of products may include toxic oxides of carbon, overexposure may cause a health hazard.

FIREFIGHTING EQUIPMENT: Full bunker gear recommended including a positive pressure self-contained breathing apparatus Water may be used to cool and protect exposed material.

Section 6: Accidental Release Measures

Isolate spill area. Provide adequate ventilation. Wear appropriate personal protection. Recover free product for recycle and/or disposal. Add sand, earth or other suitable absorbent to spill area. Prevent entry into sewers and waterways. Check under Transportation and Labeling (DOT/CERCLA) and Other Regulator Information Section (SARA) for hazardous substances to determine regulatory reporting requirements for spill.

Section 7: Handling and Storage

HANDLING: Do not puncture or incinerate can. Do not stick pin, nail, or other sharp object into opening on top of can. Avoid contact with eyes, skin or clothing. Wash hands after handling. Empty container contains product residue, which may exhibit hazards of product.

STORAGE: Store and use in a cool, dry, well-ventilated areas. Do not store above 120° F. Keep away from heat or flame.

Section 8: Exposure Controls/Personal Protection

VENTILATION: Use adequate general or local exhaust ventilation to keep airborne concentrations below exposure limits.

RESPIRATORY: Avoid breathing vapors. Use a NIOSH approved respirator when necessary.

SKIN: Use Viton or Nitrile gloves to avoid prolonged or repeated skin contact.

Section 11: Toxicological Information

ACUTE EXPOSURE

Eye Irritation: Moderate to severe corneal injury possible and redness persisting for an extended period of time, Based on data from components or similar material.

Skin Irritation: Not expected to be a primary skin irritant. Based on data from components or similar material. Prolonged or repeated skin contact as from clothing wet with material may cause dermatitis. Symptoms may include redness, edema, drying, defatting, and cracking of the skin.

Respiratory Irritation: If material is misted or if vapors are generated from heating, exposure may cause irritation of mucous membranes and the upper respiratory tract similar to that observed with mineral oil. Based on data from components or similar materials. Under good industrial hygiene practices where all exposure limits are observed, respiratory irritation should not be a problem.
